---

Release 5.2.0.6

November 21, 2016

## TABLE OF CONTENTS

NEW FEATURES.....	2
<i>DOCSIS Stats</i> .....	2
<i>View Concurrent Users</i> .....	2
FIXES AND IMPROVEMENTS.....	2
REVISION HISTORY .....	4

These release notes provide detailed information about release 5.2.0.6 of SmartRG's ACS.

## NEW FEATURES

### *DOCSIS Stats*

For DOCSIS devices, Device Manager operations users can view relevant DOCSIS statistics without swiveling through views or accessing alternate systems. This feature requires TR-098/181 parameter configurations per SmartRG specifications.

### *View Concurrent Users*

Device Manager users, with the appropriate permissions, can now see the concurrent user limit and view the list of users currently logged in to the software. Administrators will also be able to log out specific users.

## FIXES AND IMPROVEMENTS

Reference #	Description
ASD-40	Port Forwards Application allows empty string for Port Map Description
ASD-42	Create permission for active bulk operations
ASD-55	Local GUI Clickthrough link is not refreshing properly
ASD-63	DM does not show "Connections" radio mode for AC Wi-Fi Devices
ASD-92	Restrict Special Characters on SSID
ASD-98	Correct SSID special character issue in API
ASD-127	High number of portal queries
ASD-128	Bulk Operations Calendar displays invalid day when selected
ASD-132	Issue with Wi-Fi passcode and special characters
ASD-134	Adjust error message that appears when Max Concurrent License is reached
ASD-141	By default, Device Icon missing in ACS - Gateway UI
ASD-142	SpeedTest app should auto-select the newest entry
ASD-144	Zero appears before the IP Address in CSV file.
ASD-145	Unable to Save the Speed Test for manually configured URL
ASD-146	Speed Test UI is not giving results automatically once the test completed
ASD-147	Speed Test: Difference in Start and End Time is not matching with Elapsed time
ASD-148	Speed test UI issue when Throughput is "0"
ASD-150	Revert change option is not working when editing Wi-Fi passphrase
ASD-151	Bulk operation Calendar - Saturday column is not visible properly
ASD-155	Import Subscriptions - Not updating the Wi-Fi network details to device and ACS
ASD-157	Users logged in exceeds the concurrent license count

ASD-158	Concurrent Users - Last login time format should be changed to match "Users" page Last login time
ASD-159	Correct UI issue for DOCSIS - Upstream table header
ASD-160	Correct UI issue for DOCSIS - Stats label
ASD-161	Correct UI issue for DOCSIS - Network time format
ASD-162	Local GUI Click Through is not creating the "Local GUI Link" with CPE WAN Custom port
ASD-164	Speed test manual settings should work at the same time
ASD-166	Odd Save button behavior after Speed Test manual settings change
ASD-167	DOCSIS Downstream correctables - Numbers are sorted in lexical order instead of numeric order
ASD-168	Speed Test - Not showing the proper value in Speed Test Meter when it is displayed in Kbps
ASD-169	DOCSIS downstream power negative value is not displaying after exporting as CSV
ASD-170	UI Issue for Download Speed Indicator
ASD-172	Manufacturer and Device displayed as Broadcom for SR655ac
