## IMPROVEMENTS AND FIXES

### **Fixed error when saving NPT report** ASD-501

Under certain conditions, the act of saving a report from the Network Performance Test function would fail with Invalid JSON Source error. This release addresses that error and adds additional robustness to the associated API endpoints.

## TECHNICAL SUPPORT

Detailed information is available in the SmartRG [Customer Portal](#).

You can open a ticket from the Portal or submit one via [email](#).

Phone support is also available from 5am – 5pm PST at (360) 859-1780, Option 4.
