Q&A

Can the Express 5000 series be used on a non-frame relay point to point DDS or Fractional T1 network?

Q:

Can the Express 5000 series be used on a non-frame relay point to point DDS or Fractional T1 network?

A: Yes. The Express 5200/5210 has a built-in DDS CSU/DSU. Fractional T1 up to 512kbps would require a DCE card installed and an external T1 CSU/DSU.
