List of Figures

Figure 1. About n-Command MSP Screen 7

1 Introduction

The n-Command MSP 10.1.5 release addresses customer issues that were uncovered in previous code releases.

This release is generally available code. Results obtained during internal testing have been evaluated and the code has been determined to be ready for general availability. Caveats discovered during testing but not addressed in this build are listed in [Section 7, “Errata”](#) on page 8.

2 Related Online Documents and Resources

Documentation can be found on ADTRAN's Support Forum, <https://supportforums.adtran.com>, as well as in the in-product accessible online help.

3 Unsupported Platforms

The NetVanta 450 n-Command Hardware Appliance is not supported in version 10.1.3. The highest supported version for that hardware is version 8.3.3.

4 Supported Upgrade Path

Only servers running host Operating System CentOS 5.6 and above can properly upgrade to version 10.1.3. If your server is running CentOS version 5.5 or below, please contact ADTRAN Product Support at www.adtran.com/openacase for assistance with your upgrade. To check the current CentOS version on n-Command, log into the admin dashboard at **http:<IP address or hostname of server>/msp**. Navigate to **Help > About n-Command MSP**. The installed CentOS version is displayed in the **Operating System** field as shown [Figure 1](#).

5 Feature Enhancements

No new feature enhancements for this release.

6 Fixes

- Fixed a performance issue which could occur on systems with a large number of devices configured with SNMPv3 settings. (6NCMSP1015-40A, October 2018)

7 Errata

- A user cannot create more than 11 static routes.
- File uploads fail when using HTTPS with Mozilla Firefox or Google Chrome. This affects license certificate uploads, firmware file uploads, and config file uploads (for pre-install config jobs). The workaround is to use Internet Explorer.

8 Warranty and Contact Information

8.1 Warranty

Warranty information can be found at:

www.adtran.com/warranty.
