Q&A

TELCO DS-1 directly into a Quad T1 module in the TRACER 6000 series

Q: "When using the Quad T1 module for TRACER 6000 series radios, can I bring a TELCO DS-1 directly into those ports? "

A: "No, the interfaces on all the TRACER T1 radios and modules are DSX-1 level rated. To connect a TELCO DS-1 circuit, you will need an external CSU, such as the ADTRAN T1 CSU ACE.(1203022L1)"
