

Modem Management

ATLAS 550 Network Interface Module

Product Features

- One RJ-11 Port
- V.34 data rates
- Extensive self-test support
- Occupies a single network interface slot in the ATLAS 550 chassis
- Hot-swappable
- Industry-leading five-year North American warranty

The ADTRAN® Modem Management module provides a single analog POTS interface for dial-up access to a remote ATLAS™ 550. Installed in one of the network interface slots on the ATLAS 550 chassis, it is a perfect solution for applications requiring remote configuration or management. This module allows an IT Manager to access the control menu of an ATLAS 550 for configuration, statistics monitoring, or even to review alarm status. In addition, the Modem Management module includes diagnostic tools and a built-in self-test utility to assist in identifying and correcting network problems.

As with all ATLAS components, the module is hot-swappable and configuration is completely menu driven. Configuration can be accomplished through Telnet or VT100 emulation.

Modem Management

ATLAS 550 Network Interface Module

Product Specifications

Physical Interface

- RJ-11

Data Rates

- V.34 – from 2.4k up to 33.6k
- ITU-T V.90/K56flex
- ITU-T V.34, V.32bis, V.32, V.22, V.23, V.21

Error Correction

- V.42 LAPM, MNP 2-4, MNP 10

Data Compression

- V.42bis and MNP 5

Agency Approvals

- FCC Part 15, Class A; FCC Part 68; Industry Canada
CS-03 CSA/UL 950/1950 3rd Edition

Environment

- **Operating:** 0°C - 50°C (32 to 122°F)
- **Storage:** -40°C to 70°C (-40 to 158°F)
- **Relative Humidity:** Up to 95%, non-condensing

Physical

- **Dimensions:** 5.5" W x 4.25" D x 0.9" H
- **Power:** 3 watts

Product Includes

- Quick Start Guide
- A standard 4 pin telephone cable (7 foot)
