Q&A

What is DATA MODE DTE STREAMING on a DSU III AR?

Q:

What is DATA MODE DTE STREAMING on a DSU III AR?

A: This message indicates that the ANTI-STREAM timer is optioned ON in the DTE PORT CONFIG. If the DSU III AR is on a point-to-point circuit this option should be set to TIMER OFF. Changing the option to TIMER OFF should allow the normal DATA MODE messages to appear in the STATUS screen. If the circuit is active, the STATUS of the DSU III AR should be DATA MODE LOOP NORMAL.
